Working Experience

Computer Vision laboratory

Research Assistant

MICA HUST, Ha Noi

Jun 2016 - Present (on-going)

- Worked on **Plant Identification problem**, using Deep Learning model based on PlantCLEF dataset.
- Used *AlexNet*, *GoogleNet* for each task on single organ identification.
- **Improved** the identification accuracy by late fusion on multiple organs (got **better** 10-20% accuracy than single organ and 1-2% than a lot of baseline fusion such as: sum rule, max rule, product rule).

VCCorp corporation

Part-time Machine Learning Researcher

Ha Noi

Aug 2016 - Present (on-going)

- Researched about **Deep Learning for sentiment problem** in order to predict opinions and sentiments which people have about what is going on in the world around them.
- Built a **large and clean** Vietnamese dataset then experimented in *LTSM*, *GRU*, *Word2vec* & *Sentiment2vec embeddings*.
- Got **over** 85% accuracy in the sentence level for 2 labels (Positive, Negative) and over 70% accuracy for 3 labels (Positive, Negative, Neutral).
